

# WE OFFER EXPERTISE

## European Outsourced Services

NETIS has provided system integration and software development since 2009

## WE ARE PROBLEM SOLVERS

Domain knowledge in a variety of industries including healthcare, education, finance, manufacturing, telecom.

# Netis Software Development Services

NETIS has offered individual, B2B software development services since 2009. Clients include public and private organisations, while the company has been active both in commercial and Research and Development projects. Our core values include quality and reliability (having ISO 9001 and 27001), continuous development, long term partnerships, openness and flexible, adaptive work style.
